

N scale Southern Pacific Class F-70-12 Wheel Car

N scale ETA Summer 2023

Pre-orders by March 10th; Limited Production Run

Wheels of Time's Southern Pacific Wheel Car will be modeled with exact details according to the actual car - it's never been modeled before!

About the prototype: The Southern Pacific Railroad repurposed a batch of their Gunderson built F-70-12 flatcars to transport wheel sets between their main shops at Sacramento and at Houston, and with car repair facilities across their system. Further, they were used in wreck train service.

About our N scale model:

Ride Control 70-ton trucks with metal 33-in wheels, body-mounted couplers, proper ride height, fine details.

* Two Wheels of Time Custom options are available for you:

Option A - Fully assembled & decorated flatcar with wheel frame. Painted wheel sets* ready to be glued in-place. \$65 ea.

Option B - Fully assembled & decorated flatcar. A 3D printed acrylic plastic one piece wheel frame and a sprue of wheel sets - requires painting, removing from sprue, and installing on flatcar. Instructions included. \$45 ea.

As part of our Wheels of Time Custom Editions production, they are limited run; direct sales only, pre-order by March 10th to reserve! If you would like an additional SP Wheel Car Number, we might make that available if enough interest- do inquiry through our website. Thank you!
